

LEVEL 3 WITH COVID-19

supershuttle™

Let's take you where you need to go – door to door, safely and cost effectively. In the Level 3 COVID-19 environment, here's what's in place to keep you safe.

SPACING

The design of our vans provide physical distance between driver and cabin.
Under Level 3 we will leave an empty seat between 'bubbles' for separation.
Face coverings / masks are required.

Use the NZ COVID Tracer app to scan the QR code on display.

HYGIENE

Our drivers hand sanitise before departure and touching the steering wheel, and must wear masks.

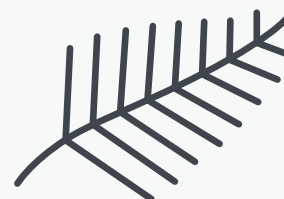

Hand sanitiser is available for all our on boarding passengers.

All touch surfaces in our vans are wiped down between every trip, using hospital grade sanitisation protocols.

Our cabins are set to flow fresh air from the front venting at the back, to maintain airflow.

Passengers must only handle their own bags.

We are operating on a "no cash" basis.

LOCAL

We are a proudly New Zealand owned and operated business - here for Kiwis for over three decades.

We have been working through all alert levels carrying our front line workers and helping get people repatriated.

We appreciate you supporting locally owned businesses and tourism. Together we can all get moving again.

Thanks for travelling with us - our team really values your business. Kia Kaha NZ!
